Modern cross-country ski trails are among key facilities at the Central Sports Centre - Olympic Training Centre in Zakopane. They are primarily intended for professional athletes i.e. national teams, with particular emphasis on cross-country skiers. Thanks to FIS (International Ski Federation) homologation championship competitions can be organized here.

Professional cross-country trails are also perfect for a training process. Their construction allows for simultaneous training and activities to be performed by cross-country skiers, skate trail lovers and runners in the most comfortable conditions.

COS-OPO trails in Zakopane have been suitably illuminated with special poles installed on individual sections and at the Winter stadium. In addition, the trails feature necessary snowmaking facilities, thus expanding the entire period of use and training opportunities.
